Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Due to an inadvertent oversight with regard to the version of the claims presented for restriction in the last Office Action, **the previous Office Action dated 16 May 2007 has been vacated and the time period for response has been reset.**

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 36-47, 50-54, 57, drawn to methods of diagnosing pregnancy-related complications comprising providing PP13-responding cells having a membrane and further comprising differential diagnosis.

Group II, claim(s) 48-49 and 55-56, drawn to kits for diagnosing pregnancy complications comprising PP13 standards, various dyes, fatty acid standards, and developing reagents..

Group III, claim(s) 58-61, drawn to a method of diagnosing pregnancy complications comprising providing a phospholipid suspension, and measuring production of prostaglandins.

Group IV, claim 62, drawn to an apparatus comprising a measuring unit and a control unit to measure modifications in permeability of the membrane of PP13-responding cells.

The inventions listed as Groups I-II and Groups III-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

For an invention, Applicant is allowed to have claims to one product, a method of making that product, and a method of using that product. Any other methods or products not corresponding to the same technical features of said product, method of making, and method of using said product, may be deemed to lack unity of invention.

Applicant is advised that the reply to this requirement to be complete must include (i.) an election of a species or invention to be examined (e.g., elect either the method and product of Groups I-II to be examined together or one of Group III or Group IV to be examined) even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Amanda P. Wood whose telephone number is (571) 272-8141. The examiner can normally be reached on M-F 8:30AM -5PM.
